- Art and Literature

### TALKS @ INDIA INSPIRES

## Let's come together to spread the eternal wisdom of India...

India is known for civilizational continuity. It has achieved this by always managing to pass its knowledge system from one generation to other, even in extremely adverse situations. There is no other country which can boast of successfully passing on its knowledge system for thousands of years.

Unfortunately, after the Independence of India, the sacred duty of transfer of knowledge has broken down. The major role in breaking this continuity is played by the nexus of Media and Academia. They became successful in this by creating anti-Indian literature in vast quantities. Their united effort has created a generation of self-alienated Indians which not only runs away from Indian civilization but also hates it.

The need of the hour is to counter this false propaganda by preserving and transferring this ancient knowledge system to our young generation. It is also very important to do this work scientifically using facts and evidences.

India Inspires has taken one step in this direction by inviting prominent scholars, thinkers, experts and researchers from across the world. These Talks are recorded in HD quality videos. India Inspires has created a web-portal, [www.indiainspires.org](http://www.indiainspires.org), where these talks are uploaded to spread them widely through social networking tools.
